

## I Application

The INNOVA P-type valve is a pneumatic shut-off double seat valve for hygienic applications. The leackage chamber, under atmospheric pressure, situated between the two seats ensures a safe interface between the two liquids, one of which is usually a CIP solution (cleaning agent).

The leakage chamber can be cleaned by independent lifting of the seats during the CIP cleaning of the line.

## I Design and features

Hygienic design according to EHEDG.
No leakage during the opening/closing of the valve.
Balanced lower seat.
Single-acting pneumatic actuator.
Easy assembly/disassembly of internal parts by loosening a clamp fastener. Open lantern allows visual inspection of shaft sealing. $360^{\circ}$ adjustable body.

I Technical specifications

Materials:
Parts in contact with the product
Other stainless steel parts
Gasket
Stainless steel AISI 316L (1.4404)
Stainless steel AISI 304 (1.4301)
EPDM (according to FDA and EC 1935/2004)

Surface finish:
Internal
External
Bright polish Ra $\leq 0,8 \mu m$
Matt

Available sizes:
